Tips for success

We pass on the secrets that might take you years to learn the hard way!

How much yarn?

Our patterns tell you how much yarn each designer used, but if you know you tend to knit tightly, buy extra yarn, just in case!

Match the swatch

To match the sizes and measurements given in our patterns you must make a tension swatch (gauge) before knifting the project.

If your swatch turns out larger than ours, try again using smaller needles. if it is too small, try larger needles.

How to sew up

- t. Before you sew knitted pieces together, pin the pieces flat to the measurements given on our diagrams
- 2 Now steam press, lightly steam or spray lightly with water depending on washing instructions on the ball band
- 3 Allow pieces to cool and dry before sewing up
- 4. To sew up use a neat back stach using the varn you knitted with Or, if the yarn is textured and hard to sew, use a smooth matching yarn - cotton with cotton, wool with wool, etc. and use mattress stitch.
- Many garments can be made up by sewing shoulder seams first, then setting in sleeve head to armhole then completing by sewing along the long seam of the sides and sleeves Each pattern has extra tips where necessary
- 6 Darn in all ends and finish seams by lightly steaming from wrong side. provided the yarn can be steamed. All measurements shown to nearest 0.5cm or 0.5in.
 - Measurements on diagrams are given in cm

Swap yarns

Discovering old patterns is a joy, but isn't it frustrating when you can't get the varn specified? Don't give up, swap old for new!

- ! Pick a modern yarn that you like, with a similar look. composition and weight to the one in the old pattern
- 2 Knit a tension swatch (gauge) and compare it to the one given in the pattern. If they both come out to the same size you're onto a winner!
- 3 Calculate how much yarn to buy. Many patterns tell you the length of yarn in each ball as well as the weight. So if the pattern uses 10 balls at 130 metres per ball, you know you need up to 1,300 metres of yarn. Check the length per ball of your new yarn and divide the total yarn length by the length in 1 ball to get the number of balls you need to make the garment.
- 4 Compare the total weight of each yarn length. For example if the original pattern had 10 balls at 50g each, the total weight would be 500g. Now that you have worked out how many balls of new yarn you are buying, just multiply the number of balls by the weight per ball. That should roughly match the 500g total that you had for the old yarn. It's just another way to check that you are on the right track.

5 Use this same method to substitute yarns for modern patterns, where the varn is too expensive or difficult to obtain, or divoujust want to use up yarn in your stash Easy really! If you are lucky enough to have a varn shop near you. it is also wise to show the pattern to the owner to get a second opinion before buying the new yarn. The advertisements in Knitting magazine are tull of sources of wonderful yarn. Many wool shops also sell on the Interent or by mail order. Happy browsing I

This purse was inspired by the wonderful embroidered straw bags popular in the 1950s. The yarn, a blend of linen, silk, and cotton, reminds me of golden straw. The herringbone stitch pattern makes the bag dense like a woven fabric and very strong and hard-wearing. I love the three-dimensional flowers, which bring this piece to life
